# Student Forms

Ellucian Student Forms automates financial aid processes through simplified workflows

73% of students said they would enroll elsewhere after waiting only four weeks on their first-choice school to process their financial aid paperwork.

Almost half of low-income students accepted into college won't enroll because they get stuck in the financial aid process. Ellucian Student Forms automates and simplifies workflows to reduce compliance risk and drive financial aid completion. It offers digital templates including verification notifications, professional judgement letters, SAP appeals, and more.

Reduce compliance risk and drive financial aid completion with Student Forms.

Convert More Prospects While Increasing Financial Aid Completion

Eliminate paper based processes and jargon-heavy documents, replacing them with checklist-driven, step-by-step guidance to improve the student experience.

Create Forms With Ease

The AI-powered forms assistant allows staff to choose from pre-filled web templates integrated with the SIS.
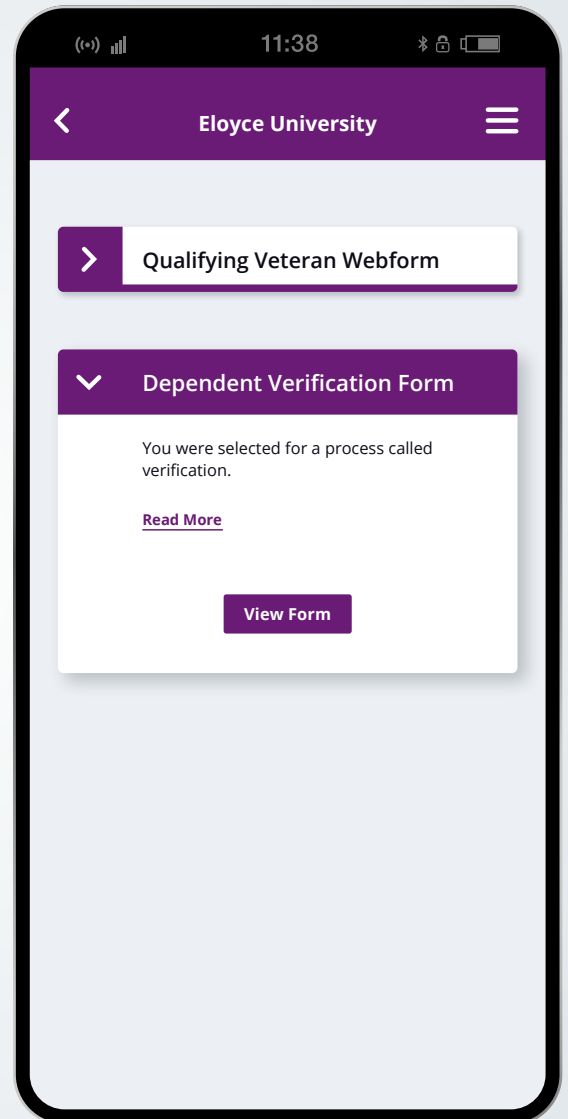

Provide a Mobile Dynamic Interface

Allow students and parents to complete tasks, receive updates, and manage documents with ease, all from their mobile device.

Improve Student Communication

Reach out proactively to communicate FAFSA renewals, summer Pell scholarship deadlines, and more through automated email and SMS messages.

Reduce Conflicting Information and Eliminate Discrepancies

Use integrated business rules to save time during the verification process and utilize pre-filled web forms with student demographic information from your systems.
